03

OVERVIEW

Social Welfare Platform

Listen2Us is a social issue addressing tool on the baseline which can benefit the society digitally. This tool provides the management of public issues which can be resolved by the local governing body provided the concern is raised by the people who belong to the respective society.

04

Mission , Vision , Goal

Mission

The application works on resolving the painful act of being behind governing body to get an issue resolved rather a problem can be reported and tracked by **LISTEN2US!**

Vision

The Vision of LISTEN2US is creating an overall approachable environment for the public to get their issues in the civic society resolved by the respective governing body.

Goal

To have a healthy society in terms of environment, administration and people welfare.

LISTEN2US KICKOFF

FACES of Application

- 01** People
The application is designed to have a portal for public people who can login, post the issues, view the issue status and the information about their constitution.
- 02** Governing Body
The governing body has the privilege to login, view the people post/issues around them, change the status of the posted issue and the information about the constitution
- 03** Admin
The admin role has the master control of the application. Admin can configure a governing body in the Application, can pull the welfare metrics of the constitution and can determine the goodwill of governing body

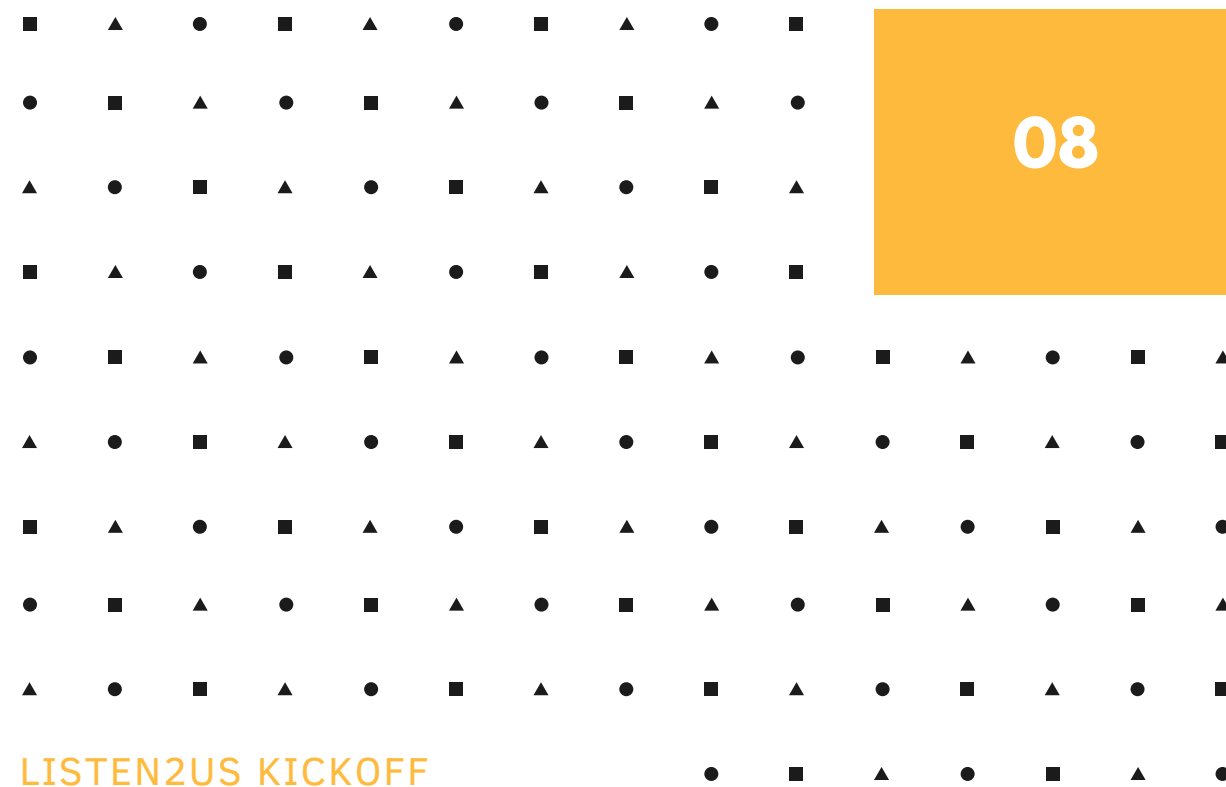

METHODOLOGY

01 AGILE Methodology

Listen2Us follows the Agile methodology with the four values and 12 principles in the as mentioned in the Agile Manifesto. Focussed on delivering Minimum Viable PProducts (MVP's) .

02 SCRUM Framework

Listen2Us follows the SCRUM framework and focuses on delivering potentially shippable goods on monthly basis. The team plugs in to weekly stand-ups and always keeps in the essence og AGILE practices at all times of work.

01 Project Management

Jira : Management of User Stories and Resources.
Tracking the various functionalities and allocation of
work accordingly. Bug tracking is also part of Jira.

02 Dedicated Space

Presentations are communication tools that can be used as demonstrations, lectures, speeches, reports, and more. It is mostly presented before an audience.

03 Break Times

Presentations are communication tools that can be used as demonstrations, lectures, speeches, reports, and more. It is mostly presented before an audience.
